

**ABSTRACT**

The present invention relates to the delivery of headache and anti-migraine compounds through an inhalation route. Specifically, it relates to aerosols containing that are used in inhalation therapy. In a method aspect of the present invention, rizatriptan or zolmitriptan is administered to a patient through an inhalation route. The method comprises: a) heating a composition, comprising rizatriptan or zolmitriptan to form a vapor; and, b) allowing the vapor to cool, thereby forming a condensation aerosol with less than 5% of the drug degradation products. In a kit aspect of the present invention, a kit for delivering rizatriptan or zolmitriptan through an inhalation route is provided which comprises: a) a thin coating of a rizatriptan or zolmitriptan composition; and, b) a device for dispensing said thin coating as a condensation aerosol
